Date: 11-Jul-2024

Designated Company Representatives and Competent Persons, Registered Greenhouse Gas (GHG) Entities under the Environmental Protection and Management Act (EPMA)

Dear Sir/Mdm

RECERTIFICATION OF CHILLER TECHNICIANS

We refer to our circular NEA-CMD-CIRCULAR-EPMA-00001-2021 dated 12 October 2021, which informed GHG Entities[1] of the regulatory requirement to have at least one valid certified chiller technician to perform GHG regulated works[1].

2 We would like to remind GHG entities that the certification is valid for 3 years and the chiller technicians will need to undergo recertification.

3 To be recertified, technicians are required to attend a refresher course and to pass a theory and practical assessment at the end of the course.

a) Temasek Polytechnic will be launching a 1-day refresher course on 10 Oct 2024. The refresher course will provide a theory and practical recap on the safe and proper handling of refrigerants during chiller servicing works and NEA's regulatory requirements.
b) The refresher course will run twice per month, subject to take-up rates.
c) The course fee is $460 before GST and grants are available to subsidise up to 90% percent of the course fee (i.e. **$46 after subsidy**).
d) More details on the course and its registration can be found at https://www.tp.edu.sg/schools-and-courses/adult-learners/all-courses/skillsfuture-series/refrigerant-handling-for-chiller-refresher.html.

4. We strongly encourage GHG entities to register your certified chiller technicians, who are due for recertification, for the refresher course early.

a) GHG entities are required to update the certification details of the chiller technicians in the WRMS-ELS portal after they have been recertified.

5. For any clarification, please contact Ms Weng Shiya (email: Weng_Shiya@nea.gov.sg).

Yours faithfully
(Transmitted via email)
