12 Nov 2024

Ref: NEA/HS/6.6/SC01

To: Industry Stakeholders

Dear Sir/Madam,

UPDATES ON EXEMPTIONS FOR DECHLORANE PLUS AND UV-328 IN SINGAPORE

Singapore is a Party to the Stockholm Convention on Persistent Organic Pollutants (POPs), which aims to eliminate and/or restrict production and use of POPs. At the 11th Conference of the Parties to the Stockholm Convention held in May 2023, the Parties agreed to adopt Dechlorane Plus and UV-328 in Annex A to the Convention for elimination, with certain specific exemptions.

2 On 6 May 2024, NEA informed industry stakeholders via a circular titled "Updates on Elimination of Dechlorane Plus, Methoxychlor, and UV-328, with Certain Specific Exemptions, under the Stockholm Convention" that the manufacture, import and export of these substances, as well as products containing them, will not be allowed in Singapore from 26 Feb 2025 onwards, in line with the deadline stipulated by the Stockholm Convention.

3 NEA notes the feedback received from industry stakeholders on the critical role of Dechlorane Plus and UV-328 in certain specific uses and applications and that the industry requires additional time to phase them out due to the lack of viable alternatives currently. After careful consideration, NEA has decided to exempt these uses and applications, as listed in **ANNEX I,** from the requirement to eliminate Dechlorane Plus and UV-328. These exemptions will be subject to future review by NEA based on the availability of viable alternatives. Industry stakeholders will be consulted during such reviews.

4 The effective date to phase out the manufacture, import and export of Dechlorane Plus and UV-328, and their products, for other uses and applications that are not listed in **ANNEX I**, remains as **26 Feb 2025**.

Harmonised System ("HS") and Product Codes

5 The list of applicable HS and Product Codes are listed in ANNEX II. Traders are required to use the appropriate HS and Product Codes when declaring their import and export TradeNet® permit applications. All such TradeNet® permit applications will be subject to the Chemical Control and Management Department (CCMD)'s approval.

6 For more information on the control of Hazardous Substances, please visit NEA's website at the following web link, i.e.,

https://www.nea.gov.sg/our-services/pollution-control/chemical-safety/hazardous-substances/management-of-hazardous-substances

7 For further enquiries on TradeNet® matters, you may e-mail them to nea_pcd_hs@nea.gov.sg.

(This is a computer-generated circular and requires no signature.)

ANNEX I

List of Allowable Exemptions from Elimination in Singapore for Dechlorane Plus and UV-328

Chemical Substances	Allowable Exemptions for Manufacture, Import, Export and Use
Dechlorane Plus and its products	(a) All medical devices listed in the First Schedule of the Health Products Act (b) Aerospace (c) Space and defence applications (d) Replacement parts for, and repair of, articles where Dechlorane Plus was originally used in the manufacture of those articles for the following applications: i. Aerospace (such as aircraft engine fan case rub strip products and void-filling and edge-sealing products, aircraft engine manufacturing repairs, electrical items, structural panels and aircraft cabin interiors) ii. Space (such as satellites, probes and other exploration equipment, manned cabins and laboratories, heat-insulating materials for rocket motors and ground support equipment) iii. Defence (such as naval vessels, missiles, launch platforms, ordnance, communication equipment, radar and lidar systems and support equipment) iv. Motor vehicles (covering all land-based vehicles, such as cars, motorcycles, agricultural and construction vehicles and industrial trucks; applications include cables, wire harnesses, connectors and insulation tapes) v. Stationary industrial machines (such as tower cranes, concrete plants and hydraulic crushers; applications include cables, wire harnesses, connectors and insulation tapes) for use in agriculture, forestry and construction vi. Marine, garden, forestry and outdoor power equipment vii. Instruments for analysis, measurements, control, monitoring, testing, production and inspection (e) Adhesives (f) Fillers (g) Plastics
UV-328 and its products	(a) All medical devices listed in the First Schedule of the Health Products Act (b) Parts of motor vehicles (covering all land-based vehicles, such as cars, motorcycles, agricultural and construction vehicles and industrial trucks), such as bumper systems, radiator grills, spoilers, car garnish, roof modules, soft/hard tops, trunk lids and rear window wipers (c) Industrial coating applications for motor vehicles, engineering machines, rail transportation vehicles, and heavy-duty coatings for large steel structures (d) Mechanical separators in blood collection tubes

	(e) Triacetyl cellulose (TAC) film in polarisers (f) Photographic paper (g) Replacement parts for articles where UV-328 was originally used in the manufacture of those articles for the following applications: i. Motor vehicles (covering all land-based vehicles, such as cars, motorcycles, agricultural and construction vehicles and industrial trucks) ii. Stationary industrial machines (such as tower cranes, concrete plants and hydraulic crushers) for use in agriculture, forestry and construction iii. Liquid crystal displays in instruments for analysis, measurements, control, monitoring, testing, production and inspection (such as recorders, infrared radiation thermometers, digital storage oscilloscopes and radiographic testing instruments) (h) Adhesives (i) Fillers (j) Plastics

ANNEX II

HS and Product Codes

S/N	Chemical	HS Code	HS Description	Product Code	Product Code Description
1	Dechlorane Plus	29038900	Other halogenated derivatives of cyclanic, cyclenic or cycloterpenic hydrocarbons (KGM)	PCDDEP111	Dechlorane Plus
2	UV-328	29339990	Other heterocyclic compounds with only nitrogen hetero atom(s) (KGM)	PCDUVA111	UV-328
