Chief Executive, Designated Representatives and GHG Managers, Registered Persons of Complex Sector 3 Facilities under the Carbon Pricing Act

Dear Sir/Madam

[CIRCULAR] FINALISED DRE-TG FOR PROCESS GHG SCRUBBERS IN COMPLEX SECTOR 3 FACILITIES UNDER CARBON PRICING ACT FROM 1 OCTOBER 2025

1 This circular informs you of the finalised Destruction and Removal Efficiency Testing Guidelines (DRE-TG) for Process Greenhouse Gases (P-GHGs) Scrubbers in Complex Sector 3 (CS3) Facilities (in **Annex**), effective from **1 October 2025**. The finalised DRE-TG was developed in close consultation with all CS3 Facilities in 2024 and 2025.

2 **CS3 facilities can continue reporting DRE for P-GHGs using IPCC default values.** Should CS3 facilities wish to voluntarily report site-specific DRE values, they must carry out DRE testing in accordance with the DRE-TG.

3 CS3 facilities can seek NEA's approval for deviations from flow and dilution measurement requirements as per Clause 4.3 of the DRE-TG, and alternative sampling size/frequency as per Clause 6.3 of the DRE-TG.

4 Should you have further queries, please refer to the Frequently Asked Questions (FAQ) in the **Annex** or contact the NEA CP-MRV team. Thank you.

Annex

Item	Description (Effective 1 October 2025)	Attachments
1	Destruction and Removal Efficiency Testing Guidelines (DRE-TG)	Guidelines on Testing DRE of Process GHGs
2	Frequently Asked Questions (FAQ)	FAQ on DRE TG.pdf

Yours faithfully
(Transmitted via email)
