NEA/HS/6.6/HSTA01

12 May 2026

To: Hazardous Substances Licence and Transport Approval Holders

Dear Sir/Madam

REVISION OF CONTAINER SIZE RESTRICTIONS FOR ROAD TRANSPORTATION OF HAZARDOUS SUBSTANCES

The transportation of hazardous substances (HS) is regulated by the National Environment Agency (NEA) under the Environmental Protection and Management (Hazardous Substances) Regulations ("EPM(HS)Regs"). Under these Regulations, any person who intends to transport HS in quantities exceeding those specified in the Schedule to the EPM(HS)Regs is required to obtain an HS Transport Approval (HSTA) from NEA.

2 Currently, HS are required to be transported in enclosed containers or goods vehicles of up to 20 feet in length. As part of NEA's ongoing review to ensure that controls governing the road transportation of HS remain relevant to industry needs and align with prevailing operational practices, NEA has reviewed the restriction in container size/vehicle length.

3 With effect from 1 Jun 2026, HS in packagings up to Intermediate Bulk Container (IBC) sizes shall be permitted to be transported in enclosed containers or goods vehicles of up to 40 feet in length, subject to compliance with all prevailing HSTA conditions. For the transportation of HS in packagings larger than IBC sizes, including ISO tankers, the existing restriction of 20 feet remains applicable. Please refer to the table below for a summary of the current and revised restrictions.

Table: Summary of Current and Revised Restrictions

Current Restriction	Revised Restriction (w.e.f. 1 Jun 2026)
HS, regardless of packaging sizes, are required to be transported in enclosed containers or goods vehicles of up to 20 feet in length.	HS in packagings up to IBC sizes shall be permitted to be transported in enclosed containers or goods vehicles of up to **40 feet** in length. HS in packagings larger than IBC sizes (e.g. ISO tankers) are required to be transported in enclosed containers or goods vehicles of up to **20 feet** in length.

4 NEA will update the relevant licensing conditions for affected HS licenses and HSTA to reflect this change at the next appropriate opportunity (e.g. during renewal or amendment applications).

5 NEA would like to remind all HS licence and HSTA holders to comply with all relevant controls governing the transportation of HS. Any person found in violation of the Environmental Protection and Management Act and the EPM(HS) Regs shall be liable to prosecution.

6 For further enquiries on the revised container size restrictions, you may contact the following officers:

- Mr Marvin Ong (Marvin_ONG@nea.gov.sg)
- Ms Quek Jin Jin (QUEK_Jin_Jin@nea.gov.sg)
- Mr Loh Guo Wei (LOH_Guo_Wei@nea.gov.sg)

- Mr Najib Zakaria (Najib_ZAKARIA@nea.gov.sg)
